PROFILE

Full-stack developer with about four years of experience building websites and web applications. Work spans frontend design, backend development, databases, APIs, payment integrations and deployment. Comfortable taking a project from an initial idea to delivery or contributing to an existing team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion.

Backend and data: Node.js, Express, PostgreSQL, Supabase, MongoDB, REST APIs, JWT.

Web3: Solidity, Hardhat, Ethers.js, Web3.js, WalletConnect, IPFS.

Integrations and delivery: Paystack, Stripe, Resend, n8n, Zapier, Git, Vercel.

INDEPENDENT DEVELOPMENT EXPERIENCE

Website and application development across property, hospitality, e-commerce and Web3 projects. Responsibilities include page design, responsive frontend implementation, backend integration and deployment. Ongoing work includes debugging, feature improvements and supporting existing applications.

SELECTED PROJECTS

Idoko C Idoko Consulting - client work

Full-stack development, UI design, database integration and deployment for a property consultancy. The workflow connects property requests, quotations, payments and report delivery. Live site: www.idokocidokoconsulting.com.

Aurora NFT - Web3 application

Website and application development covering collection browsing, artwork creation and wallet-connected collector views. Portfolio walkthrough includes mint review and account screens. Live site: www.auroranft.art.

BlaiseTech - portfolio and interactive tools

Next.js/React portfolio with protected visitor analytics, server-side validation and a five-section website designer. One canvas renderer produces desktop and phone previews and PNG downloads.

NovaTrade and Horizon - proof-of-concept projects

Trading-platform and fintech interface demonstrations. NovaTrade explores a product designed for broker integration; Horizon covers accounts, transfers and receipts. Neither is presented as a live brokerage or banking service.

PROJECT WALKTHROUGHS

Case studies, screenshots and an engineering walkthrough are available at blaisetechh.com. Private source code and client credentials are not published. For a role or contract, contact the email above.
